The “Saturn” collection

A trip to Outer Space to discover Saturn and its gold and diamond rings.

September 2010

A collection inspired by the rings around one of the most enigmatic and symbolic planets: **Saturn**.

A journey **somewhere between dreams and reality** taking you away from Earth and towards distant horizons in search of Saturn's Rings. In space and on Earth, these rings will **intrigue** and hypnotise you.

An animal spirit watches over these **precious** representations and only he can guide you through the maze of discovery...

One clue: the gold rings of Saturn are a tangle of pink, white and yellow and are decorated with diamonds to make them even more dazzling when they turn.

Now it is down to you:

The collection:

Royal Saturn Ring

Vortex Ring

Spatial Form Ring

Trifolie Ring

Princess Saturn Ring
